

EDUCATION

• The LNM Institute of Information Technology - Jaipur, Rajasthan	Aug. 2023 – May. 2027
<i>Pursuing Computer and Communication Engineering</i>	CGPA 7.63
• Emmanuel Mission School - Kota, Rajasthan	Apr. 2021 – Mar. 2023
<i>Science [PCM + Computer] (CBSE)</i>	12th Percentage/Grade: 94.3%
• St. Patrick's Higher Secondary School - Asansol, West Bengal	Apr. 2011 – Mar. 2021
<i>Secondary Education (ICSE)</i>	10th Percentage/Grade: 94.7%

PROFESSIONAL EXPERIENCE

• Lusip Lnmiit - Summer Internship	June 2025 - July 2025
<i>Unsupervised Image Restoration Techniques</i>	Certificate Remote
– Collaborated with Dr. Indra Deep Mastan, IIT BHU on unsupervised image restoration, focusing on techniques like Deep Image Prior for tasks such as image denoising and super-resolution without ground truth supervision.	
– Achieved 92.8% Pixel Precision and 0.666 IoU on held-out test set; ablation confirmed PatchGAN adversarial training improved Region-mIoU by 4.1% over U-Net-only baseline.	
• IndoUG Commerce and Social Council (ICSC)	June 2026 - July 2026
<i>Data Analyst Intern</i>	Offer Remote
– Analyzed and prepared structured business data using Python, Pandas, SQL, and PostgreSQL, improving data quality through cleaning, validation, and standardization.	
– Built ETL workflows with Alteryx and developed Power BI dashboards to track KPIs, identify trends, and support business reporting and decision-making.	
• Teaching Assistant Lnmiit	Aug. 2024 - Apr. 2025
<i>Design and Analysis of Algorithms, ML models, Scripting Languages, Problem Solving</i>	Certificates Onsite
– Supported the understanding and implementation of core machine learning models including Linear Regression, K-Means, Decision Trees, Random Forest, Clustering, and more.	
– Optimized code architecture and engaged students with real-world scenarios to connect their theoretical concepts with practical applications in the field of programming.	

TECHNICAL PROJECTS

• ClinicOS - Healthcare Appointment Management Platform	Sep. 2025
<i>Next.js React TypeScript Tailwind CSS ShadCN UI Jest</i>	Demo GitHub
– Built a responsive healthcare management platform with reusable React components for appointment scheduling, patient records, dashboards, analytics, and role-based workflows.	
– Developed maintainable frontend modules including forms, tables, charts, authentication flows, and interactive UI states using Next.js, TypeScript, Tailwind CSS, and ShadCN UI.	
– Implemented automated testing with Jest for component behavior, validation logic, authentication scenarios, and critical workflows to improve frontend reliability and code quality.	
• JobFit - Resume-Job Matching & Skill Analysis Platform	Sep. 2026
<i>Python Django Django REST Framework React Vite PostgreSQL TF-IDF Aho-Corasick</i>	Demo GitHub
– Built a full-stack resume analysis platform that compares resumes with job descriptions and generates match scores, missing skill insights, and actionable improvement suggestions.	
– Developed a custom skill extraction engine using a 146-skill taxonomy and hand-written Aho-Corasick automaton for efficient one-pass keyword matching with word-boundary validation.	
– Implemented resume-job similarity scoring using a custom TF-IDF and cosine similarity engine, along with graph-based implied skill detection without external ML libraries.	
– Designed REST APIs using Django REST Framework with PostgreSQL for managing resume uploads, job descriptions, analysis history, and comparison reports.	
– Created a responsive React + Vite dashboard with interactive score visualization, skill highlighting, upload progress tracking, and side-by-side job comparison features.	
• Craafter - AI Full-Stack Website Builder	Jul. 2025
<i>Next.js TypeScript Gemini E2B Inngest tRPC</i>	Demo GitHub
– Built an AI-powered full-stack application builder that generates, previews, and iterates Next.js applications from natural language prompts using Gemini and E2B cloud sandboxes.	
– Developed a multi-agent workflow with Inngest, tRPC, Prisma, and PostgreSQL for AI-driven code generation, sandbox execution, live preview, and versioned project iterations.	

• SyncPen

Jan. 2025

[Next.js](#) / [Convex](#) / [Clerk](#) / [Gemini](#) / [TailwindCSS](#) / [ShadCN](#)

[Demo](#) | [GitHub](#)

- Built a real-time productivity platform combining a Notion-style document editor, Excalidraw-inspired whiteboard, and AI assistant using Next.js and Convex.
- Implemented nested document management, file uploads, authentication, publishing, and page-aware AI chat with Gemini integration, enabling seamless content creation and collaboration.

• GAN-based Copy-Move Forgery Detection

Nov. 2025 - Apr. 2026

[Python](#) / [PyTorch](#) / [Conditional GAN](#) / [U-Net](#) / [PatchGAN](#)

[GitHub](#)

- Built a Conditional GAN (U-Net generator + PatchGAN discriminator) to pixel-level localize copy-move forgeries, with composite loss (weighted BCE + Dice + adversarial) to counter 5:1 class imbalance on CoMoFoD dataset.
- Implemented base-image-grouped train/val/test splitting to prevent data leakage, and adversarial training loop with Adam ($\beta_1 = 0.5$) for stable GAN convergence over 100 epochs.

TECHNICAL SKILLS

- **Languages & Frameworks:** C++, C, JavaScript, TypeScript, React, Node.js, Next.js, Java, Python
- **Systems & Tools:** Linux, Bash, REST APIs, PostgreSQL, Prisma, MongoDB
- **Problem Solving:** Solved problems on platforms like [LeetCode](#), [Codeforces](#), [CodeChef](#), [GFG](#), [Coding Ninja](#) etc.
- **Achievements:** LeetCode Knight (1900+ rating), CodeChef 3-Star

POSITIONS OF RESPONSIBILITY

• Secretary, ACM

Aug. 2025 – May. 2026

Student Chapter - LNMIIT

[Certificate](#)

- Coordinated with faculty advisors and external speakers, handled logistics for ACM events, competitions, and coding contests, and onboarded new members.
- Organized and successfully managed 3 large-scale technical events/workshops, engaging 1000+ student participants across multiple domains.
